SUBJECT: Drum Identification - A. L. Taylor Site

RECEIVED
JUL 28 1980
DIV. OF HAZARDOUS MATERIAL
AND WASTE MANAGEMENT

On July 17, 1980, I met with Mr. Carroll Lang (Operations Manager) and Mr. Ralph Davis (Production Supervisor), both of Kurfees Coatings, to assist in verification of Kurfees' previous drum identification inventory at the Valley of the Drums (refer to memorandum dated April 7, 1980).

Of the total of 84 previously identified drums, Mr. Lang could only verify 39 drums as belonging to Kurfees Coatings. This verification consisted of visually inspecting the 84 drums' contents.

The contents identified in the 39 drums are:

1. General plant refuse - trash, plastic liners, and solidified paint waste.
2. Acrylic resins - these will be proposed to be recycled within Kurfees manufacturing processes.

Mr. Lang informed me, he will contact Jack Wilson as to Kurfees Coatings stand regarding today's inspection.
